ALFE CHEM INDIA

Production and Development

For its innumerable need nowadays foundry and mechanical industry requires new fluids environmental friendly for different applications able to assure the best performances / price performance. Thanks to constant care on research of new technologies and the attention devoted to overcome the most complex problems, the Company has rapidly asserted itself in industry and metal working market.

FoundryChem / AlfeChem structures means staff and organization, offers vanguard products, high technical competence and best service. The Company sustains the introduction of its products in the market through a careful technical cooperation with the customers in order to understand their expectations and technical needs and optimize technical and economic outcomes. Last, but not least, FoundryChem / AlfeChem is able to supply for who requires it, its Chemical Management: Olitema.

Olitema is a FoundryChem brand providing a global solution to the problems and costs due by fluid and chemicals management.

- more efficient products
- lower costs
- more care for the environment

Corporate Strategy

- Commitment to Health, Safety and Environment
- Commitment to Total Quality Management
- Supply High Performance, Cost Effective Products and Services

FoundryChem / AlfeChem is provided with an internal laboratory, that is managed by skilled technicians. The firm owns the most modern and sophisticated equipment and carries out a determinant and irreplaceable analysis of the raw materials and a severe check of the formula qualitative standards. The technical staff carries out a constant research to identify the problems and study innovative solutions in a relation of real partnership with the customer.

Sales & Marketing
Worldwide

Foundry

- Release agents for brass
- Safety hydraulic fluids
- Coating and paints
- Continuous casting release agents
- Hot forming and forging fluids
- Diathermic fluids
- Heat treatment

Lubrication

- Rolling oils
- Drawing oils
- Metalworking fluids
- Special products for extrusion
- Pastes and greases
- Auxiliary and lubricants
- Cleaning and detergents
- Protective oils

Olitema

- Equipment and maintenance
- Analysis and process control
- Global chemical management
